# NFIRS Coding

## Incident Type 611: Dispatched and Canceled En Route

**Incident Type 611:** Use this code if you were dispatched and canceled en route or the incident cleared or canceled prior to arrival of the responding unit.

If a unit arrives on the scene, fill out the applicable Incident Type Code and required modules.

## Completing the Report:

### Required: Basic Module

- Location
- Incident Type: **611**
- Aid Given or Received: None or Other (Aid was not given or received since you did not arrive on scene)
- Alarm Date and Time
- Last Unit Cleared Date and Time
- Actions Taken: **93 Canceled En Route**
- Resources

### Required if Occurs:

Fire Service Casualty Module

### Optional:

Apparatus/ Personnel Module

- Actions Taken- 93 Canceled En Route for each apparatus
- Do not enter an Arrival Date or Time.

## Avoid Common 611 Validation Errors

**Error: Action Taken Canceled En Route, Incident Type not 611 Dispatched and Canceled En Route**

**Fix:** Change the incident type to 611. Actions Taken code 93 (canceled en route) can only be used with Incident Type 611.

**Error: Incident Type is 611 Canceled En Route, Incident Actions Taken not Canceled En Route**

**Fix:** Change the Actions Taken to 93. The only valid Actions Taken Code for Incident Type 611 is 93 (Canceled en route).

**Error: Module not allowed given incident type**

**Fix:** Remove any Module not listed above as required or optional.
